## CLASSIFICATION OF MANUFACTURING

To whom it may concern,

I am writing to clarify our product classification and manufacturing processes at Veneer Stone. We specialize in the manufacturing of concrete-based products, utilizing sand, cement, and various additives tailored to meet industry standards and customer specifications.

It is important to emphasize that our products are distinctly categorized as concrete-based, not engineered stone like benchtops. Our manufacturing techniques and product composition are designed specifically for the production of robust precast concrete products suitable for a wide range of construction applications.

Should you require further details regarding our manufacturing processes or have any questions regarding our product classification, please feel free to contact me directly. We are committed to providing clear and accurate information about our operations.

Thank you for your attention to this matter.

Best regards,

*Rob Baxter*
